

# Birdie Pattern Template

Cut out your patterns below. Then use them as templates and cut two of each one out your colored or patterned paper of choice. If your using paper that is not double sided make sure to turn your wings the correct direction for the opposite side of your bird. You should also do this if the back of your paper has a different pattern than the front. But it's entirely up to you! Feel free to mix and match wings if desired.
